SEC. 2. FINDINGS.

The Congress finds the following:

(1) Diverse individual-owned and controlled firms continue to face obstacles, such as discrimination and other related barriers, when competing for investment adviser services opportunities, including Federal opportunities.

(2) The Government Accountability Office found in September 2017 that asset management firms (also known as firms providing investment adviser services) registered in the United States manage more than $70,000,000,000,000 of assets and that minority- and women-owned asset management firms manage less than 1 percent of such assets.

(3) Conscious efforts to facilitate diverse and inclusive firm selection for investment advisers services opportunities are required to overcome obstacles facing diverse individual-owned and controlled firms, especially as women- and minority-owned businesses across the financial services sector struggle to recover from the impacts of the coronavirus disease (COVID–19) outbreak and future major disasters.

(4) Despite evidence that women and minority-owned firms perform as well as and sometimes outperform their industry counterparts, they are not consistently selected to manage institutional assets.
Although women and minority-owned firms account for approximately 8.6 percent of the asset management industry, recent reports show that they only manage 1.1 percent of all assets under management or $785 billion out of $71.4 trillion, and are underrepresented as managers in every asset class.
