Like roads and bridges, affordable housing is a component of the nation’s infrastructure and a long-term asset that helps communities and families by connecting them to resources and opportunities. Congress must provide the resources necessary to increase the affordable housing supply in order to address the affordable housing crisis that our nation faces. According to the National Low Income Housing Coalition, nationwide there is a shortage of more than 7 million rental housing units that are affordable and available to the lowest income families. In fact, no state in America has an adequate supply of affordable housing for the lowest income renters. Our public housing stock, which houses 1.9 million Americans, is also in dire need of investment to ensure that it can continue to provide safe and decent living conditions for its residents. In fact, there is an estimated public housing capital needs backlog of $70 billion.

Neglecting our housing infrastructure not only hurts families and communities, but it is a lost opportunity to create jobs and boost our economy. According to the National Association of Home Builders, building 100 affordable rental homes generates 300 jobs, $28 million in wages and business income, and $11 million in taxes and revenue for state, local, and federal governments. This legislation would make the investments we need in our housing infrastructure and create jobs across the country. As the Administration and House and Senate leadership negotiate an infrastructure package, this legislation offers a blueprint for how a portion of the funding in that package should be dedicated to affordable housing infrastructure.

The “Housing Is Infrastructure Act of 2020” would provide the following investments into our affordable housing infrastructure to create or preserve approximately 1.8 million affordable homes:

- **$70 billion** to fully address the capital needs backlog for nearly 1 million public housing homes;
- **$1 billion** to fully address the capital needs backlog for approximately 14,000 Section 515 and 514 rural homes;
- **$1 billion** to support mitigation efforts that can protect communities from future disasters and reduce post-disaster federal spending;
- **$5 billion** for the Housing Trust Fund to support the creation of nearly 60,000 new units of housing that would be affordable to the lowest income households;
- **$100 million** to help over 13,300 low income elderly households in rural areas to age in place;
- **$1 billion** for the Native American Housing Block Grant Program to create or rehabilitate over 8,800 affordable homes for Native Americans on tribal lands;
- **$10 billion** for a CDBG set-aside to incentivize states and cities to eliminate impact fees and responsibly streamline the process for development of affordable housing;
- **$5 billion** for the HOME Investment Partnerships Program to fund the construction, purchase, or rehabilitation of over 136,600 affordable homes for low-income people;
- **$2.5 billion** for the Supportive Housing for the Elderly program (Section 202) to create over 54,800 new homes affordable to low income seniors;
- **$2.5 billion** for the Supportive Housing for Persons with Disabilities program (Section 811) to create 27,000 new homes affordable to low income individuals with disabilities; and,
- **$2.5 billion** to the Capital Magnet Fund for competitive grants to Community Development Financial Institutions to create or preserve nearly 450,000 affordable homes.

In addition, the “Housing Is Infrastructure Act of 2020” requires ten percent of nearly all funding authorized in the bill to be used for sustainable features such as energy and water efficiency retrofits, including those that reduce utility costs for residents. The bill also promotes the inclusion of minority and women owned businesses by requiring that grantees conduct outreach to inform them of opportunities created through funds provided. Lastly, the bill requires reporting on fair housing outcomes of housing units made available with authorized funds.
